

Gentlemen, I seldom become involved with either political party. However, the Sinclair Broadcasting Company's flagrant disregard of the expected bipartisan use of American airwaves is very discouraging. Since they are a large conglomerate, they are able to dictate programming to my local channel 13. As I understand the issue, the FCC in 2000 allowed the "equal time in the air for both sides of issues/political parties" to cease. If the Sinclair Broadcaster's planned use of the airwaves is any indicator, WE NEED MORE REGULATION, NOT LESS. As an American citizen/taxpayer I want to feel that if I listen to "news" it is not "opinion" of the station owner, especially if that station owner does not reside locally. I would appreciate a reply from you. I plan to send this message to the FCC in the hope you will stop broadcasting monopolies and the unamerican trend toward one company having the power to dictate what we will watch on American airwaves. jrstock35@cs.com
